Request for Proposal – CombiFlash: An Automated Flash Chromatography System

(RFP-IITD AD-PD 26/043)

The Indian Institute of Technology Delhi – Abu Dhabi (IITD-AD) intends to procure the **CombiFlash, an automated flash chromatography purification system**, to strengthen advanced research capabilities and hands-on teaching infrastructure in chemical and interdisciplinary sciences. The system will support rapid, efficient, and reproducible purification of organic compounds, thereby enhancing research productivity, laboratory efficiency, and student training in modern separation and purification techniques.

Brief Project Scope:

Project Overview	IITD-AD seeks to procure the CombiFlash, an automated flash chromatography purification system, to strengthen advanced research capabilities and hands-on teaching infrastructure in chemical and interdisciplinary sciences. The system will support rapid, efficient, and reproducible purification of organic compounds, thereby enhancing research productivity, laboratory efficiency, and student training in modern separation and purification techniques.
Objectives	• To procure an automated flash chromatography system for teaching and research activities at undergraduate and postgraduate levels. • To support compound purification and separation for academic, student projects, and research applications. • To provide hands-on training in modern chromatographic purification techniques. • To strengthen the University's teaching and research infrastructure in chemistry and related disciplines.
Scope	Procurement includes supply, installation, commissioning, calibration, user training, warranty, and after-sales support for one automated flash chromatography system, CombiFlash. The scope also includes compatible fraction collectors, software, essential accessories, consumables for initial operation, and on-site training for faculty, researchers, laboratory staff, and students at IITD-AD.

Confidentiality & NDA Requirement
